About

I am a junior Full-Stack Web Developer and very passionate about my field. I love to know things related to all these fields and gain new experiences in the niche which increases my field of interest and raises me to maximum potential.

Projects

• Minor Dog Dating site
This is the small dating platform for all dogs, Where they meet each other on this site.
Technologies Used : HTML, CSS, Bootstrap.

• Drum Kit Site
In this project, I made a small Drum kit. It is a simple arcade game that is played with a tap.
Technologies Used : HTML, CSS, Javascript.

• Weather App Project using NodeJS
In this, I am building a geolocation-based weather app using real-world API that will show us the current weather data depending on the user's location.
Technology Used : HTML, CSS, JavaScript, NodeJS.

• Online Shopping Site   (ongoing)
I am currently working on an online shopping site
Technologies Used : HTML, CSS, Bootstrap,javascript., ReactJs, NodeJs.
